

Introducing “bit-x-bit in-a-box™” Simplifying ESI Preservation and Collection

Pittsburgh December 19, 2011: **bit-x-bit in-a-box™** - our forensic collection kit is an easy way of taking control of the ESI preservation process. In one package, we deliver the hard drive and our custom software which enables key employee custodians or client IT staff to make a forensic image of a laptop or desktop, preserving all potentially relevant ESI at their convenience, and all for one very affordable price.

bit-x-bit in-a-box™ includes:

- Easily executed software with three simple steps for making a forensic image
- A one TB hard drive with USB plug-in
- Streamlined easy-to-use return packaging

Price: \$400, plus the cost of shipping. Convenient and secure payment by credit card.
