## FOR IMMEDIATE RELEASE

### Take a Look at Sfile's New Features Faster, Smarter, Cheaper Web-based E-Discovery Review

**PITTSBURGH, July 27, 2011** – bit-x-bit announces several new features now available in Sfile, bit-x-bit's e-discovery web-based review platform, including new icons, color-coded document determinations, and faster duplicate determination and coding

Rolled out in version 3.0.2.5, Sfile has improved the platform with the following enhancements:

- New icons for better visibility of email and attachments
- Color coded document determinations allowing reviewers to quickly assess that status of documents (red for privileged documents, green for relevant documents and blue for non-relevant documents)
- Enhanced customized coding fields through the Multi-Options menu, fully searchable in the Advanced Search Builder, to capture the most relevant data
- Single instance/relevance determination of duplicate documents (reviewers see a list of all duplicate documents while looking at the first unique document/item)

Exclusively endorsed by the Allegheny County Bar Association, bit-x-bit offers Sfile's fully integrated web-based electronic e-discovery review platform at the lowest industry cost of \$150 per gigabyte to ACBA members. Included in the cost is access for an unlimited number of reviewers/users for an entire year, as well as training.

For demonstration of Sfile and these new features, please contact us at 412-325-4033.
