FOR IMMEDIATE RELEASE

bit-x-bit Receives Certification from the NWBOC

PITTSBURGH, July 6, 2011, bit-x-bit, LLC is pleased to announce that the National Women Business Owners Corporation (“NWBOC”) recently certified bit-x-bit as a woman-owned business enabling bit-x-bit to compete more effectively in the corporate and government procurement processes.

“With our client base expanding nationally in the private sector, as well as the governmental arena, certification by the NWBOC is an important step in the process of continuing to build our firm and compete successfully with national providers in the computer forensic and e-discovery field, said Susan Ardisson, Chief Executive Officer of bit-x-bit.

bit-x-bit was founded by Susan Ardisson and her brother Scott Ardisson in 2007. As CEO, Ms. Ardisson oversees the business, project management, and marketing operations for the company.

Exclusively endorsed by the Allegheny County Bar Association since 2008, bit-x-bit provides comprehensive electronic discovery and computer forensic investigation, analysis, processing and consulting services to national and regional companies and law firms. Services include computer forensic investigations (typically involving employee use and misuse of company computer systems or the potential theft of confidential information), and e-discovery (the collection, processing, hosting and production of electronic data in litigation cases).

The NWBOC is a national certification program that verifies the ownership and control of businesses by a woman, and provides prospective purchasers and buyers with the assurance of doing business with a woman-owned and controlled business. The goal of the NWBOC is to encourage procurement officers to utilize women-owned firms.
