FOR IMMEDIATE RELEASE

**bit-x-bit Forms Strategic Alliance with Sfile to Offer Web-Based
E-Discovery Review Services**
Allegheny County Bar Association Endorses New Review Services for Its Members

PITTSBURGH, January 5, 2011— bit-x-bit launches its web-based e-discovery review platform, powered by Sfile, an industry leader in comprehensive e-discovery hosted review systems and software.

“Our alliance with Sfile will allow us to significantly expand the range and depth of services we provide,” said bit-x-bit CEO Susan Ardisson. “Sfile has one of the industry’s most economical pricing models, and as we continue to expand as a company, we will continue to search for ways to improve the e-discovery value we can offer our clients, large and small.”

bit-x-bit is currently endorsed by the Allegheny County Bar Association as the provider of computer forensic and electronic discovery litigation support services to its more than 6,500 members, and the ACBA has extended that endorsement to bit-x-bit’s use of the Sfile platform.

“One of our primary objectives is to offer cutting-edge and affordable products and services to our more than 6,500 members, and this new web based e-discovery service by bit-x-bit and Sfile is another enhancement to our member benefits,” said David Blaner, ACBA Executive Director. “We are proud to have an excellent working relationship with bit-x-bit, whose leaders seem to be a step ahead of everyone else in anticipating the needs of the legal community.”

bit-x-bit chose Sfile over other e-discovery review platforms in the market because of its range of capabilities and its remarkably lower overall costs. Based in Houston, Texas, Sfile is an industry leader in e-discovery software and infrastructure systems, serving the legal community since 2005.

With Sfile’s fully integrated web-based electronic e-discovery system, bit-x-bit will be able to offer advantages such as Sfile’s early case assessment, document review and production capabilities for an unlimited number of attorney reviewers, per case, at the lowest industry cost. bit-x-bit clients will be able to purchase Sfile services for \$150 per gigabyte for an entire year.

computer forensic investigation and e-discovery consulting services

Sfile provides bit-x-bit's clients the advantages of cloud computing architecture, in which processes are spread among a number of servers, allowing for accelerated processing and greater scalability of the review platform to accommodate small and large cases.

Sfile also uses a universal document display program, so documents can be viewed in their native file format without costly conversion to other formats.

The news of the strategic alliance between bit-x-bit and Sfile follows the company's recent announcement of the addition of Joseph Decker, Esq. as Vice President and General Counsel, who brings with him 25 years of experience as a business litigator and trial attorney, and established his law firm's e-discovery department

About bit-x-bit:

Founded in 2007 by brother and sister Scott Ardisson and Susan Ardisson, bit-x-bit now provides e-discovery and computer forensic consulting services to most of Pittsburgh's major law firms, many local and national companies, as well as Duquesne University and the Office of Attorney General for the Commonwealth of Pennsylvania.

Since 2008, bit-x-bit has enjoyed the exclusive endorsement of the Allegheny County Bar Association (ACBA) to provide computer forensic and e-discovery consulting services to the ACBA's members. Also in 2008, bit-x-bit received a grant from the Pittsburgh Central Keystone Innovative Zone (PCKIZ) to help fund expansion and hiring at its offices located in the historic Frick Building in downtown Pittsburgh.
